INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:		2. Operational Period: DAY	
MAPLE SPRINGS		Date/Time From: 11/11/2016 0700 FRI	Date/Time To: 11/12/2016 0300 SAT
3. Objective(s):			
<p>1. Provide for the safety of firefighters and the public using the risk management process to identify hazards and mitigate risks throughout the duration of the incident.</p> <p>2. Minimize impact to private landowners' values by prioritizing operations in areas that are under immediate threat.</p> <p>3. Minimize impacts to natural resources with emphasis on protection of the Sand Creek timber sale and Joyce Kilmer Memorial Forest.</p> <p>4. Monitor fire spread in the wilderness area and use appropriate tactics as needed to protect values adjacent to this area.</p> <p>5. Provide accurate information to the citizens, media, and government entities with timely dissemination of incident intelligence.</p>			
4. Operational Period Command Emphasis:			
<p>Leader's Intent: Be prepared for the unexpected.</p>			
General Situational Awareness:			
<p>Be prepared for sudden increases in wind speed. Firefighters will need to survey their work areas for potential hazards. Drive safely - use extra caution driving to and from the incident.</p>

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildfire
FIRE NAME: Maple Springs	OPERATIONAL PERIOD: Day 11/11/16
DATE ISSUED: November 10, 2016	TIME ISSUED: 1945
UNIT: Nantahala NF	SIGNED: Al Stover - FBAN 

INPUTS

WEATHER SUMMARY: Dry high pressure will build during the day with a strong, dry cold front late Friday. Sky/Weather: Patchy fog and smoke through 10 AM, then sunny. Max Temp: 59°. Min RH: 34%. Winds: Northwest 6-12 mph with higher gusts in the afternoon. Humidity recovery 76% overnight.

See the attached NWS Spot Forecast for more information

FUELS:

The primary carrier of the fire is hardwood litter with some dead/down component. Fuels will remain critically dry until significant precipitation is received. All fuels are readily available to burn and be receptive to ignition. Heavy fuels will burn until consumed or extinguished. Leaf fall is in progress and contribute to a high resistance to control. Drought conditions will allow for deep organic material to hold heat and require extensive mop up. KDBI values over 700 are common.

OUTPUTS - FIRE BEHAVIOR

GENERAL: Expect potential active fire behavior on any portion of the fire line.

Low RH's and potential gusty winds when the inversion lifts will make for another challenging day. Terrain may cause erratic winds and when wind/slope aligns, strong uphill runs will occur. Where sheltered fire behavior will be driven by topography & fuels. Flame lengths of 3-6 ft. with rates of spread around 15-20 ch/hr. are likely with any head fire. Low-Moderate flame lengths/spread rates when backing or flanking. Expect prolific short range spotting. The fire will remain active well into the night.

SPECIFIC:

DIV E/N – The fire will continue to back/flank to the west and work upslope to the northwest. If the fire crosses the Joyce Kilmer road near the division break an upslope run to the south may occur.

DIV X – Favorable winds/slope should limit the fire behavior to backing with moderate spread and reduced risk of spotting. The fire should continue to hang up in the drainage bottom. However, if it crosses, it will run to the ridgetop.

DIV Z – Continued backing/flanking. Watch for any fire that becomes established below the structures in the Lindy Road area and spotting/creeping across the lines. Recently burned out lines will hold heat for a considerable amount of time and have a high risk of escape.

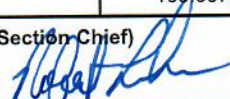

DIV CC – The fire will continue to move east along the ridgetop and spread downhill on both the north and south aspects. Use ignition techniques to limit fire intensity when burning out the line to help reduce the risk of spotting/slop overs. Be alert for gusty winds at the ridgetops and eddies on the lee sides. Any escapes will rapidly threaten nearby structures.

AIR OPERATIONS: A strong morning inversion along with generally smoky conditions throughout the day will hamper air operations.

SAFETY:

Due to the extremely dry fuel conditions, be alert to changes in wind and fire alignment. A slight gust of wind or small draw can change a backing/flanking fire into a head fire immediately. The high risk of spotting due to leaf fall can quickly cut off escape routes. These are just some of the situations to watch out for today.

HEALTH AND SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Maple Springs

DATE: 11-11-16

TIME: Day

Major Hazards and Risks:

Snags

Driving

Communications

Structure Protection

Heavy Equipment

Fire Order of the Day – Fight fire aggressively having provided for safety first.

Narrative:

Snags-Bug killed trees are very weak and may be rotted. Carefully assess their condition and fall only those which can be done safely. Avoid those too rotted to fall safely by identifying and relocating line where necessary.

Driving-Use extreme caution driving in smoke. There is heavy public traffic on most roads and drivers may be distracted. Obey all traffic laws. Lights and seatbelts on!

Communications-New repeater is in operation. Conduct radio checks. Use human repeaters where necessary.

Structure Protection-Following Wildland Urban Interface Guidelines in IRPG pages 12-16.

Heavy Equipment-Stay 2 ½ tree heights away from heavy equipment. Ensure you have eye contact with the operator before approaching. Avoid working below heavy equipment.

Review Medical Plan-Talk through a scenario on your division implementing the 9 line medical incident report.

Watch Out Situation of the Day

5. UNINFORMED ON STRATEGY, TACTICS
AND HAZARDS

Escape Route/Safety Zone Checklist

Escape Routes:

- *More than one escape route
- *Scouted – soils, vegetation, slope
- *Timed – slowest person, fatigue, dozer speed
- *Marked – flagged for day and night use

Safety Zones:

- *Survivable without a shelter
- *Natural – clean burn, water, bare soil/rock
- *Manmade – constructed sites, roads
- *Scouted for size and hazards
- *Close enough considering escape time needed

Remember and Follow:

- *The 10 Standard Fire Orders
- *The 18 Situations That Shout Watch Out
- *The Common Denominators of Fire Behavior on Tragedy Fires
- *The Downhill Line Construction Guidelines
